President's Message

Autumn Leaves – The frost is on the pumpkin. September 22nd and already a foot of snow in the mountains. Fall is here and winter is on the way. As I look back on the summer, I see a successful year for RMSA. We have had lots of fun contests and many of us have had the opportunity to attend national contests with a good turnout at the Nats and other contests. Quite a bit of action still remains for RMSA this year. Our October and November contests remain and competition is tightening up for those year end club championship points. As some of you may know, the October meeting is typically the meeting where you nominate your officers. In November we elect officers and the December meeting is when new officers preside over a gathering for the first time.

As we contemplate leadership for the club next year, a couple of items have occurred to Jim, Bob and myself. First of all, club meetings have been poorly attended and we have not done a good job of generating programs that people are interested in and therefore meetings are hard to promote and populate. We collectively believe that part of this problem could be solved by having better meetings with a designated person scheduled to present a particular program. I think that the problem could be solved by having fewer meetings. I think that the solution is a combination of both. As we move into the Fall, club leadership will be developing a new meeting schedule to offer to the new club leadership for consideration. That schedule might look something like this:

January - CD's meeting draft rules and contest schedule for next year.

February - Second CD's meeting to revise and adopt rules and schedule for next year, finalize sanctions.

(We need to firm up some of the championship scoring rules to make issues perfectly clear to everyone)

March - Winchmaster's meeting - maintenance issues, operation, ect.

April – Scheduled program, club business,

May – Scheduled program, club business

June – Short meeting after monthly unlimited contest

Next Meeting: Date/Time: October 3, 2000 - 7:00PM Location: Heli Port Hobbies 1400 W 70 Ave Denver CO 80221-7023 See map in March 2000 Newsletter

July – Short meeting after monthly unlimited contest August - Short meeting after monthly unlimited contest September – Scheduled program, club business October – Scheduled program, club officer nominations November – Scheduled program, club officer elections December – Year end banquet

Please let me know what you think of this idea. Regarding the current officers, we aren't completely spent, although we don't know if other club members might be interested in becoming officers. I'm willing to continue as an officer if nominated on a couple of conditions: One that someone else assume my winchmaster responsibilities which I have held for approximately two years. Two that Jim continues as an officer and is willing to cede approximately 30 or 40% of his current workload with newsletter and scoring to me. I think that Jim has done the majority of the club hardest work for a long time and we benefit greatly from his efforts. So basically we are willing, we need a little volunteer help with the winches. Anyone willing to have free use of a club winch and retriever in exchange for maintaining it and bringing it to contests, please step forward. If other club members are interested in being officers next year please attend the October meeting or let us know of your intentions.

Finally, lets continue to be vigilant about our field protocols. Have a good Fall everybody!

Shannon

October Open Contest – October 15, 2000 Co-CDs Jim Monaco/Shannon Bingham

Registration:	8:00 am to 8:30 am
Pilot's Meeting:	8:30 am
First Round:	9:00 am
Entry Fee:	\$5.00

Tasks:T1 International Duration - durations set according to conditions and turn-out.Landing:L4 Spot Landing with AMA tapes.

Scoring: Man on Man – random flight group assignments

No flying prior to start of contest Novices limited to **RES** type sailplanes

NOTE: This is NOT the weekend after the meeting!! This contest was scheduled for the 15th in order to avoid conflict with the Visalia Fall Festival that a number of our members attend.

Challenge Cup Results CDs Jim Monaco and Shannon Bingham

RMSA is again the Challenge Cup winner continuing the rights to hold the trophy for 2001, but just as importantly we continue to keep the home field advantage, hosting the 2001 Challenge Cup. It was a pretty close battle right up to the end. There was often talk about strategies and who should come down when, so-as not to damage a teammate's score. Congratulations to the top 5 RMSA flyers who contributed to the final team scores. Skip, Bob Charlie,Gary and Jack did a great job. Two Lewan boys in the top 5 - that's gotta feel good... Our British transplant Phil just missed the top 5. That Starlite flys a bit better with the v-tails going in the right direction – eh?

The PPSS team flew quite well with Mark Howard flying in enemy colors. Mark managed a top 5 PPSS finish even with almost 700 point hit in Round 4. He won every other round too... Ouch.

We got off to a slow start – then the sprinkler came on and began it's march towards the flight line – fortunately it was off – they were just repositioning it. We managed to wind everything up about 11:30 and with just a few minutes delay set the lines up in the other direction and were flying again quickly. MANY thanks to the winchmasters who coordinated and executed the move. Shannon and I shared CD duties, and poor Shannon was suffering from a bit of hanging on illness. We ran things man-on-man with line breaks and popoffs moved to the next available spot in another group. This actually worked out quite well.

I experienced some misfortune when 1) Marc turned our Eraser on before the transmitter, and the transmitter was on a different model. This overdrove the aileron servo and terminally jammed it – out for the contest. 2) Marc launched with my Emerald and popped off – probably because the launch setting were not set up properly yet on my new Stylus. 3) On his relaunch Marc popped off again – only this time with no control and augered in. We are not sure what went wrong, but suspect the switch was not completely in the on position and it switched off during the "exciting" launch. It has since been repaired and is not as pretty as before but is still serviceable.

Included here are some pictures from Dr. Dan...

I think everyone had fun and that is the main point of being there. Thermals - Jim

August 2m Results CD Mark Howard

This was one tough contest. The temperatures were in the high 80's - although with the humidity it felt much warmer. The format was the usual 7 min. tasks with runway landings. Simple eh?

Not one pilot maxed all 6 rounds! Lenny Keer took a 225 point hit in the second round and still won. I took a 522 point hit in the fourth round but took second. What a crazy day. The scores weren't the only problem for several pilots. Phil Jones crashed in the third round following a mid-air with Mr. Zika's Super-V. Bob Moffett was posed to win after five rounds, but his Image had other ideas. On launch it never pulled out of the zoom -- diving to the ground. I stripped a flap servo when the winch line broke on launch -- before I released the plane - the plane recoiled and the flap hit me in the head. Art Ries had various problems keeping his wing's from mating, but prevailed in Novice. John Kappus survived a low-level pop-off for a max. He took Sportsman honors.

For this contest, I tried a new launch strategy - everyone launches at once (or nearly so). I think this worked well to ensure man-onman competition; however there were several near-mid-airs on tow, so I abandoned that idea. We could probably do this if we set the winches up farther apart. We also had problems with pop-offs. I announced at the pilot's meeting that any pop-off would require a group re-flight as we had no spare winch. As usual, we had a few pop-offs at the start of the contest - from all three classes. But the problem persisted and became quite annoying. To remedy this, I'd suggest we limit the pop-offs to one per contest regardless of class. I'd like to see us standardize other pop-off procedures as well (time to declare, spare winch permitted, if so how much time into the round before a re-flight is required....).

All in all a very long day. I congratulate the winners, and lament the losses. As 2M participation is down this year, I'll probably drop back to one 2M contest next year. Mark

For Sale

Selection of built, balanced, ready to fly hand launch gliders with servos and battery.

Tom Gressman Office 303-744-3535X 3101 Home 303-979-8073 Email tgressman@aol.com

Moulded Emerald - Fixer-upper dorked Emerald composed of the following:

repaired fuse (broken tailboom repaired with a jig (its straight and compares identically to an un-dorked fuse) and carbon fabric. Fuse also has some dings and cracks in nosecone area which have been repaired with CA.

One relatively undamaged LEFT wing built with this model with a minor delam in the skin near the root. Wing has Airtronics 141's installed and carbon ziggies on control surfaces. Wing is Red top, black bottom custom color.

One relatively undamaged RIGHT wing from another model which crashed and destroyed its left wing - lucky for me. Wing had some tiny prototype Airtronics servos in it which have been expertly removed. Wing has internal control surface pushrods for flaps and brass tube ziggie for aileron a la the newest Emeralds. Wing comes with two Airtronics 141's from the original Right wing. Locator pin in this wing will need to be relocated in order to seat with the hole in the fuse. I suggest replacing the internal push rod situation with another set of carbon ziggies like those already in the left wing and you are ready to go. Wing has a few minor skin delams around the servo pockets and push rod exits. Alignment with the fuse fairing, wing rod and the other wing is absolutely perfect. Color match is also perfect, red top, black bottom. R&R gets the Eli Whitney award for parts being identical on two models approximately 1.5 years apart in vintage.

EXTRA RIGHT wing - a set of replacement Emerald wings are priced at \$500, so don't laugh at me for throwing this in, it may be of value to someone. One dorked right wing with root damage, but undamaged spar caps. Repairable if you need another wing or want to attempt to sell this one to someone trying to restore a dorked Emerald. Need to reglue spar tube and do some rohacell and skin repair. Comes with some extra rohacell from R&R. Potential great winter project if you know how to repair molded models.

Stabs are perfect. red top black bottom. Rudder is built-up. 5/8 carbon wing rod. Model comes with battery, switch, two fuse servos all installed and ready to go. Standard size Airtronics servos in fuse, one high torque, contest servo for elevator - ultralight carbon pushrods. Total of six servos. Just add your receiver, finish servo installation in replacement right wing and go fly.

I'm asking \$425 for the model with six servos - someone could have a pretty nice Emerald in the air in a couple of evenings for a reasonable price. **Shannon Bingham** (303) 499-2314 **binghams@boulder.earthnet.net**
